

Please join us for a ride on county roads to tour some small towns and breakfast in Riverside. Plan on thirty minutes for driving.

**Start at Fort Ouiatenon in West Lafayette.**

**Note:** From US 231 and Indiana 25 head north to South River Road (next light) then, turn left (west). Drive for two and a half miles, the park entrance will be on the left, past the intersection with County Road 300 West.

**Wabash River, Fort Ouiatenon**

From the fort turn left onto South River Road. Continue to Green Hill. Turn left onto County Road 1125 East and head south.

**Downtown, Green Hill**

Turn right onto County Road 500 North, it bends around and becomes 1100 East.

**Weiler-Leopold Niches Land Trust, Independence**

Road bends around again becoming Independence Road.

At Independence turn left onto Cicott Road / County Road 800 East (Warren county) / 500 East (Fountain county).

**United Baptist Church, Independence**

Cross over the Wabash River.

Go through Riverside and continue south on County Road 500 East.

**Old Barn, Riverside**

About one mile south of Riverside turn right into Bossaer Farms. We will have breakfast at the Bakery & Cafe.

Bossaer Farms Bakery & Cafe is open Wednesday through Saturday, 7:30 AM to 2 PM.

**Bossaer Farms Bakery & Cafe, Riverside**

When leaving you can continue south on County Road 500 East to Indiana State Route 28, just a couple miles south.

Or you can go back the way we came but turn right at the stop sign just past the railroad tracks. This is a very nice road that will take you to Indiana State Route 25 in West Point.

For a side trip, go back to Independence and turn left at the four way stop and drive west through town.

**College Rock, Independence**

Turn right on County Road 600 East, about one mile south on the right side of the road is College Rock. After talking with some of the professors at Purdue I believe it is miss-named and should be called Collage Rock as it probably came from the Canadian Collage which includes the Canadian Shield, a source of many rocks brought down by the ice age glaciers.
